**Purpose of Contact:** Agreement to leave the remaining B730 slab in-place

### Discussion

The Building 730 slab will be approximately 20 feet below final grade at Site closure. The slab under the southern tanks was removed and the remaining slab is approximately 23 feet long (north-south) and 35 feet wide (east-west). Radiological surveys of the slab were performed after demolition was completed. Based on these surveys, the remaining radioactivity for the slab was calculated to be 0.04 pCi/g.

Based on the results of the radiological surveys and because the majority of the carbon tetrachloride has been removed, this portion of the slab will be left in place.
